CAVEATS:

The '//Karas' administrative level 1 feature name includes the click consonant that is symbolized with a non-Latin character. The ADM1_EN attribute field includes only Roman characters but the ADM1ALT1EN field includes the click consonant symbol.

This dataset fits the former 107 constituency system but does reflect the split of Kavango region into Kavango East and West. Namibia has adopted a new 120 constituency system but population statistics unavailable.

OCHA

Population projections to 2041 are provided at the administrative level 0 (country) 1 (region) levels. The source data treats Kavango instead of the new split between Kavango West and East. Therefore, the ratio of administrative level 2 (constituency) data was used to distribute the projected populations for Kavango West and East
